**APPLICANT'S COMMENTS ON EXAMINER'S STATEMENT OF REASONS FOR
ALLOWANCE**

Although the Examiner's statement attempts to narrow the patentable aspects to identified method limitations or circuit portions, patentability of the claimed invention should be considered as a whole. In addition, the Examiner refers to figures in the application, which describe a particular embodiment, not the claimed invention. And the invention is as defined in the claims, not as paraphrased by the Examiner. Finally, dependent claims that the Examiner did not refer to each include additional patentable limitations that further define the invention.

Applicant also points out that there is a typographical error in the identification of one of the references considered by the Examiner. JP 1081523 should have been identified as JP 1081526, as can be seen on the face of the reference and its associated English abstract, both of which are contained in this Image File Wrapper.

Customer No. 20575

Respectfully submitted,
MARGER JOHNSON & McCOLLOM, P.C.
